### **Job Purpose**

To contribute to leading the project: Systematic Review: Sweet taste liking and adiposity as directed by the Principal Investigator. The project will undertake a systematic review of the published literature, to identify and collate all relevant published articles, to result in a published journal article. The role of the Post-doctoral Research Assistant is to contribute to the project delivery by conducting all aspects of the research in a timely manner, and by leading others in this endeavour. You will be directly responsible to the PI on the project and responsible for supervising other members of staff and their work.

### **Main Responsibilities**

1. Deliver research objectives of proposed work within the timeframes of the project and ensuring the achievement of project outcomes.
2. Conduct research using standard systematic review processes.
3. Write up research work for publication, to include research outputs and reports.
4. Supervise the work of other members of the project team on the systematic review.
5. To ensure and take responsibility for the quality of the work of others.
6. Ensure maintenance of data and records in accordance with standard systematic review processes.
7. Identify opportunities and support on preparing proposals for research grant funding
8. Continue to develop a body of published work and/or artefacts relevant to own discipline both in terms of type and volume.
9. Build relationships with internal and external contacts to exchange information, publish outputs, develop future collaborations and identify potential sources of research funding / opportunities to collaborate.
10. Undertake training as required by the University and as befits your role for Institutional safety and for staff development

## **Organisation Chart**

The PI – Katherine Appleton will have overall oversight of the project.

A PDRA will report to the PI and manage all day-to-day activities for successful completion of the project.

Other team members, including all RAs will report to the PI and undertake research work as requested by the PI and the PDRA.

## **Dimensions**

The project is funded by the Union of European Beverages Association to investigate the association between liking for sweet taste and adiposity. To investigate this association, we will undertake a systematic review, where we will systematically search the published literature to identify and summarise all published articles investigating sweet taste liking and adiposity.
